#### WEEKLY GRAIN AND PROVISION REVIEW

Chicago, Oct. 2-Canadian compe tition has been a big factor this week in forcing the wheat market here sharply downgrade. pared with a week ago, wheat this porning was 8c to 14c lower, corn off 31/4c to 5c, oats carying from 1/4c decline to 1/4@%c gain and provisions at losses of 75c to \$1.45. Some cutting of commodity val-

as to financial conditions had shaken the confidence of wheat bulls, and it soon became evident that the market was unable to withstand continued announcement of large imports from Canada for domestic millers. The fact that on the resulting decline export business of large volume took place in the United States failed to act as a counterbalance. Meanwhile bearish estimates of the world supply did a good deal to influence sentiment, scarcity could develop before May torney showed every promise attention was given to advices that THE STATED CONVOCATION OF BOCK Indian had released 14,000,000 bushels of wheat for export, notwithstanding recent word of widespread starvation there.

Despite frost, corn went downward with wheat. One authority figured that the corn yield would exceed the government forecast by 82,000,000 bushels.

Oats were relatively firm owing to scantiness of receipts.

Provisions reflected the ness of breadstuffs and corn.
